

Special dimensions

Thanks to our in-house production and advanced machinery resources, we are able to produce seats exactly made to measure. Therefore we can produce special sizes or even produce new models adapted to your needs.

Development

You haven't found what you were looking for? Our team will make suitable seating for you whether you already have an exact idea of what you want or not. We will advise you on the choice of the correct colours and materials. In that way we can achieve your desired project together with you.

Dismantling/disposal/installation

For 50 seats or more, you are able to order our service team to install your new seating. There will be a prior inspection appointment to measure and document the floor characteristics and angles in order to carry out an error-free installation.

Our team would be glad to handle any dismantling and disposal for you. Please request a no-obligation quote from us.
